

1. Im Webbrowser (Internet Explorer, Safari, Firefox, Chrome, etc.) die Adresse: **http://192.168.0.1** eingeben.
2. Das Feld **Username leer lassen** und als **Password admin** eingeben.

The screenshot shows the Technicolor login interface. At the top left is the Technicolor logo. The main heading is "Login". Below it, a message says "Login : Please enter username and password to login". There are two input fields: "Username" (empty) and "Password" (containing "admin"). A "Login" button is located below the password field and is highlighted with a red box.

3. Unter **Wireless – Primary Network** kann der **Name** (SSID) und das **Kennwort** (WPA Pre-shared Key) geändert werden. Mit einem Klick auf **Apply** werden die Änderungen gespeichert.

The screenshot shows the "Wireless" configuration page in the router's web interface. The "Wireless" tab is selected and highlighted with a red box. In the left sidebar, "Primary Network" under both "Wi-Fi 2.4G" and "Wi-Fi 5G" is highlighted with red boxes. The main content area shows the "802.11 Primary Network" configuration. The "Network Name (SSID)" field contains "Tech_D0021907" and is highlighted with a red box. The "WPA Pre-shared Key" field contains "*****" and is also highlighted with a red box. Other settings include "Primary Network" (Enabled), "Automatic Security Configuration" (Disabled), "Closed Network" (Open), "AP Isolate" (Disabled), "WPA Enterprise" (Disabled), "WPA-PSK" (Enabled), "WPA2 Enterprise" (Disabled), and "WPA2-PSK" (Enabled). The "WPA/WPA2 Encryption" is set to "TKIP+AES". At the bottom, there are fields for "RADIUS Server", "RADIUS Port", and "RADIUS Key". An "Apply" button is highlighted with a red box at the bottom center.
